#### Follow-up on instantaneous speeding

Referring to the data of SkyPier HSF movements in June 2016, instantaneous speeding (i.e. a sudden change in speed at over 15 knots for a short period of time) within the SCZ was recorded from 13 HSF movements. Among the 13 HSF movements, the duration of instantaneous speeding of 12 movements were less than 1 minute, whilst the remaining one movement lasted for less than 3 minutes. After investigation, the AIS data and ferry operators' responses showed that all the cases were due to public safety / emergency reasons including local strong water currents and giving way to other vessels. The captain of all concerned cases had reduced speed and maintained the speed at less than 15 knots after the public safety / emergency incidents.
