

Appendix C. Monitoring Results

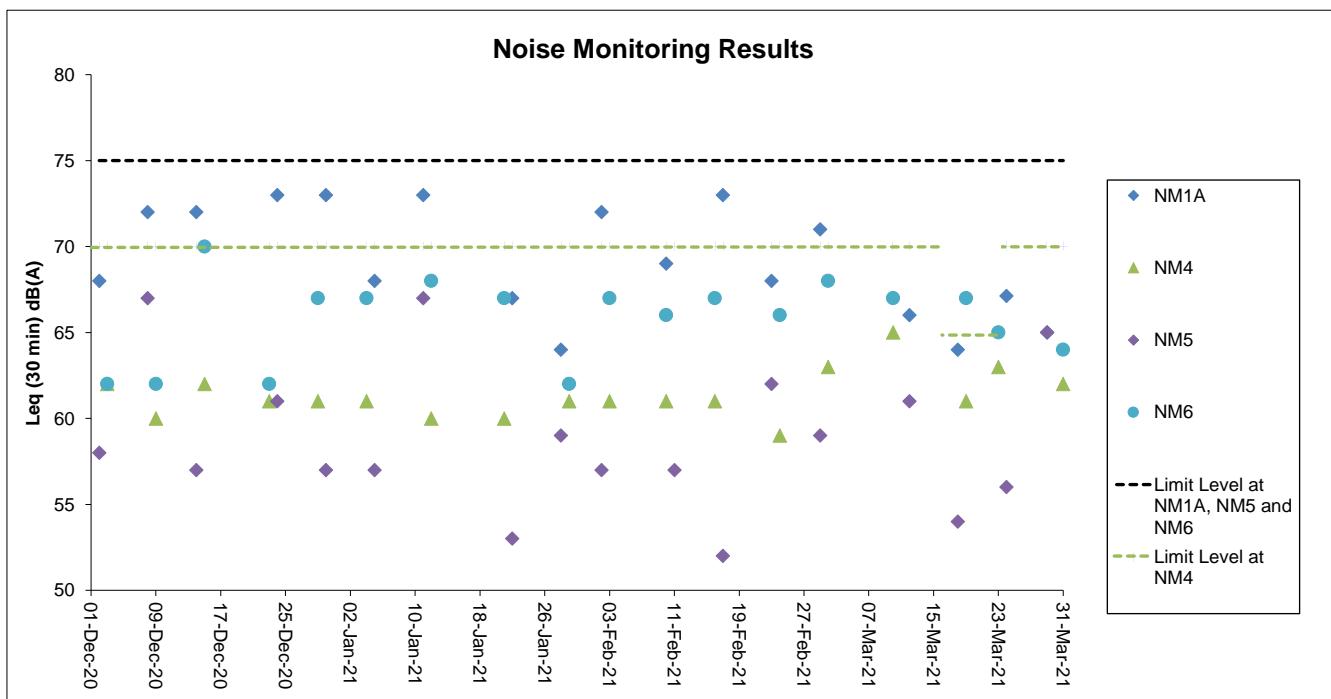

Air Quality Monitoring Results

Notes:

1. The key activities of the Project carried out in the reporting period included reclamation works and land-based works. Works in the reclamation areas included DCM works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights. Land-based works on existing airport island involved mainly airfield works, foundation and substructure work for Terminal 2 expansion, modification and tunnel work for APM and BHS systems, and preparation work for utilities, with activities include site establishment, site office construction, road and drainage works, cable ducting, demolition of existing facilities, piling, and excavation works.
2. General weather condition during monitoring ranged from sunny to cloudy. Detailed meteorological conditions can be referred to Table 2.3 of this Report and corresponding Monthly EM&A Reports.
3. QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

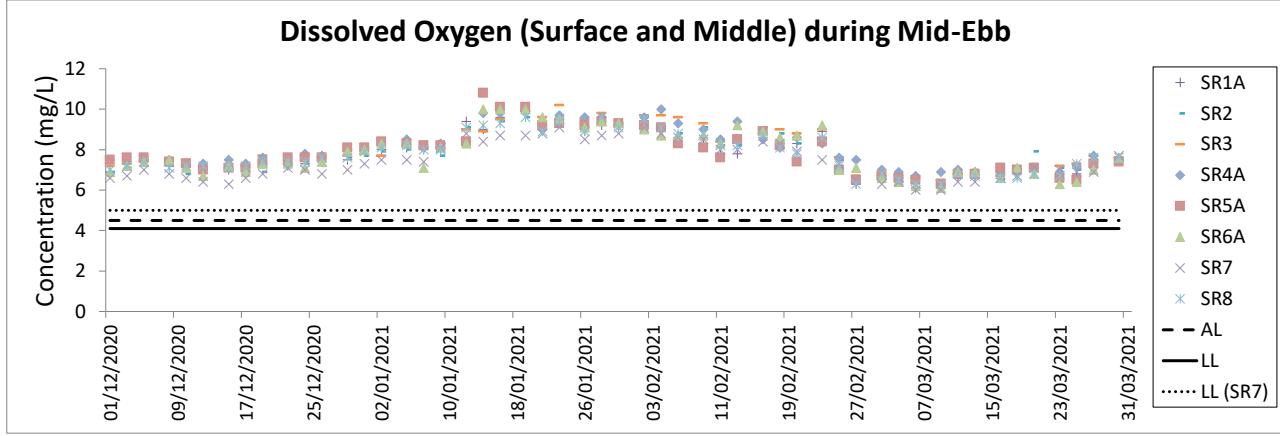

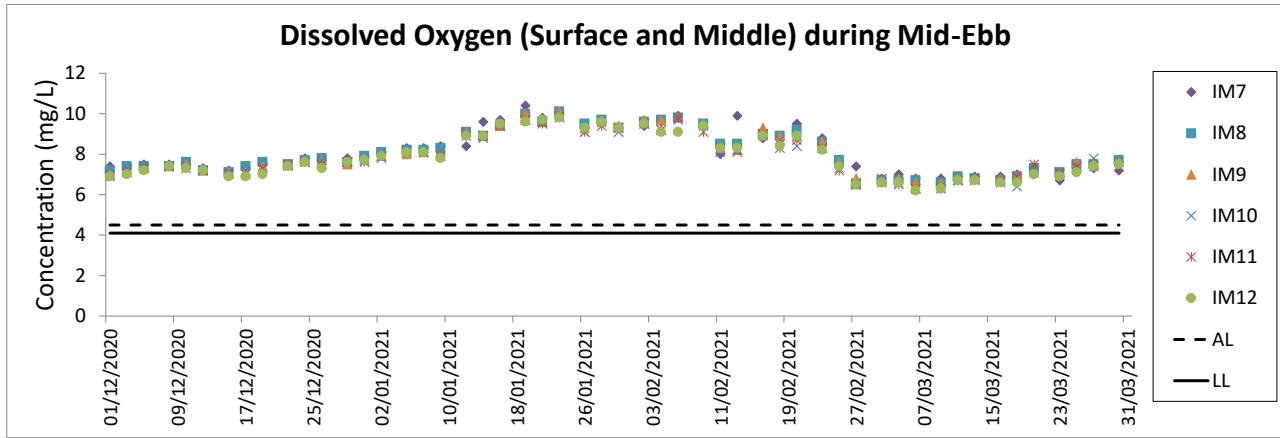

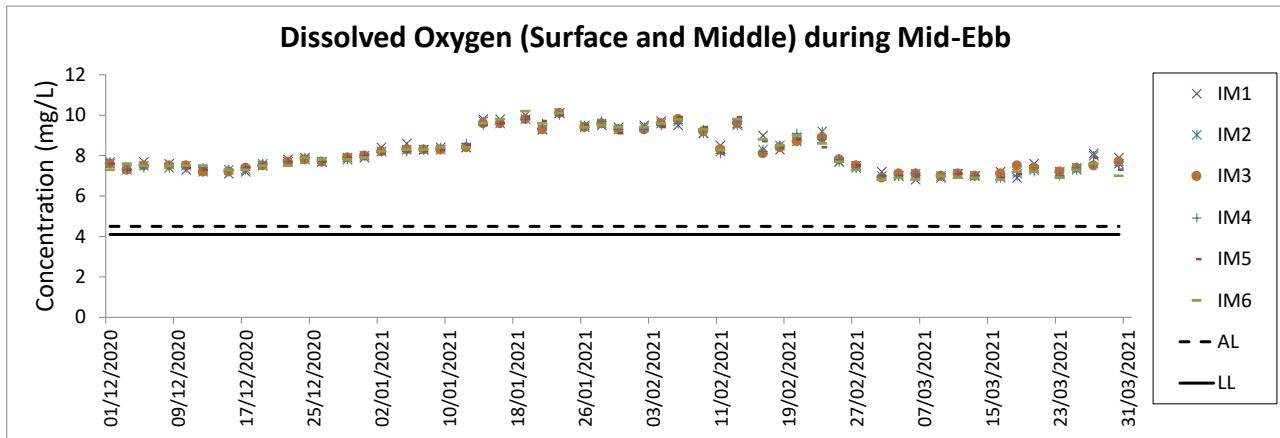

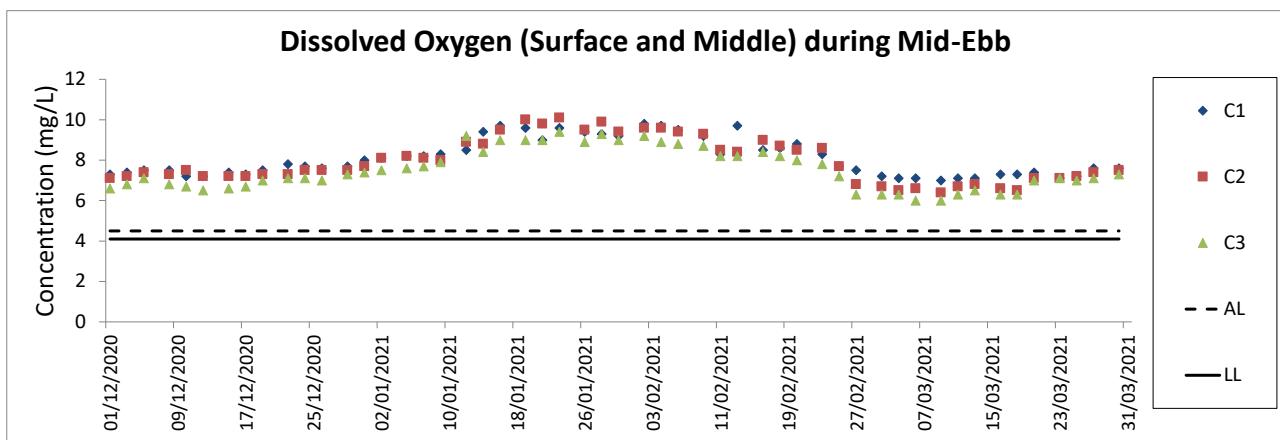

Noise Monitoring Results

Notes:

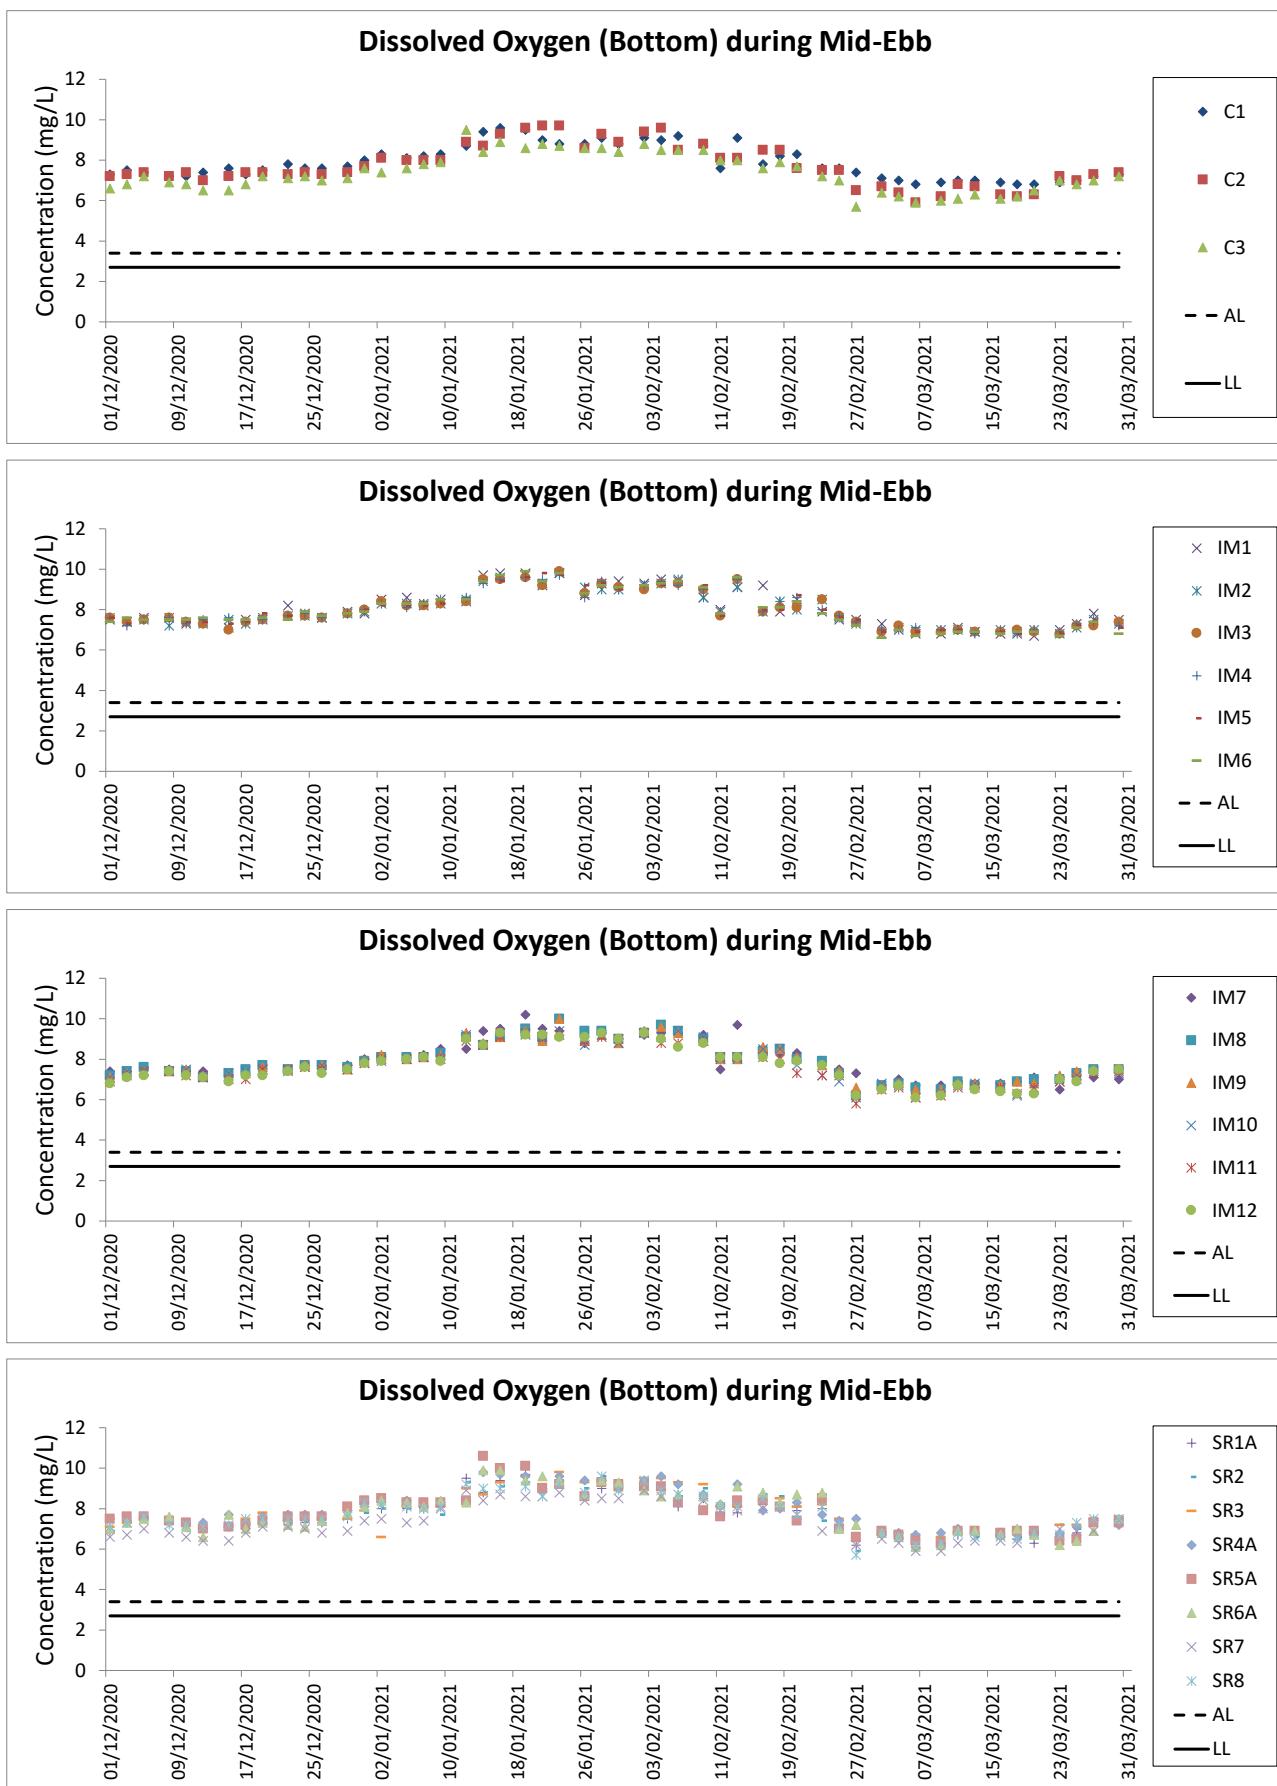

1. The Limit Level is reduced to 70dB(A) for school and 65dB(A) during school examination period at NM4. School examination took place from 18 to 24 March 2021 during this reporting period.
2. The key activities of the Project carried out in the reporting period included reclamation works and land-based works. Works in the reclamation areas included DCM works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights. Land-based works on existing airport island involved mainly airfield works, foundation and substructure work for Terminal 2 expansion, modification and tunnel work for APM and BHS systems, and preparation work for utilities, with activities include site establishment, site office construction, road and drainage works, cable ducting, demolition of existing facilities, piling, and excavation works.
3. General weather condition during monitoring ranged from sunny to cloudy. Detailed meteorological conditions can be referred to Table 2.6 of this Report and corresponding Monthly EM&A Reports.
4. QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

Water Quality Monitoring Results

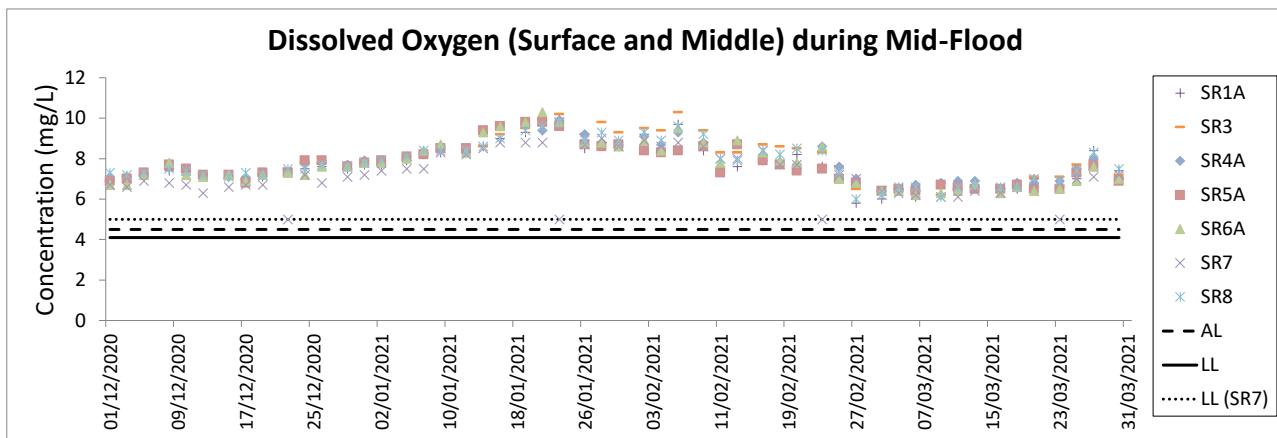

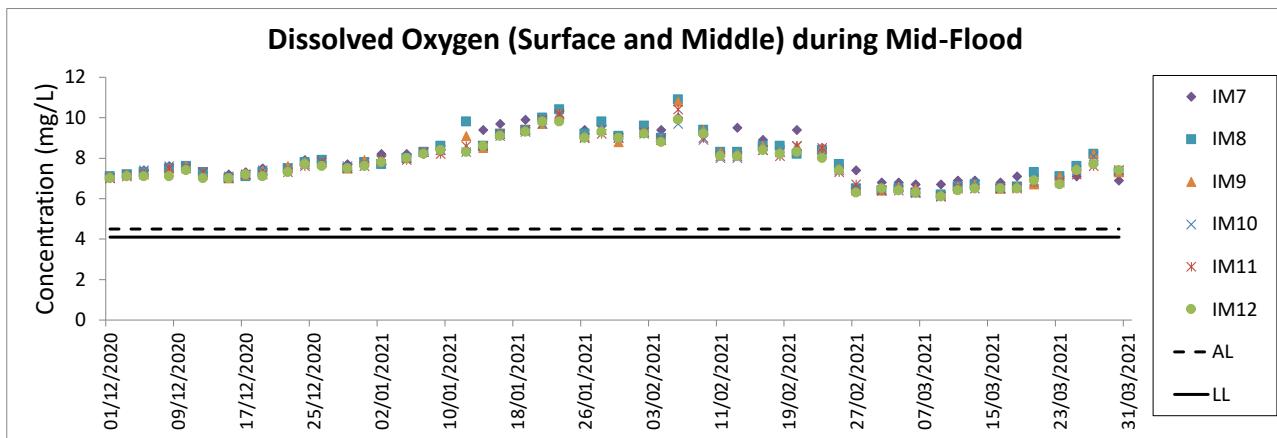

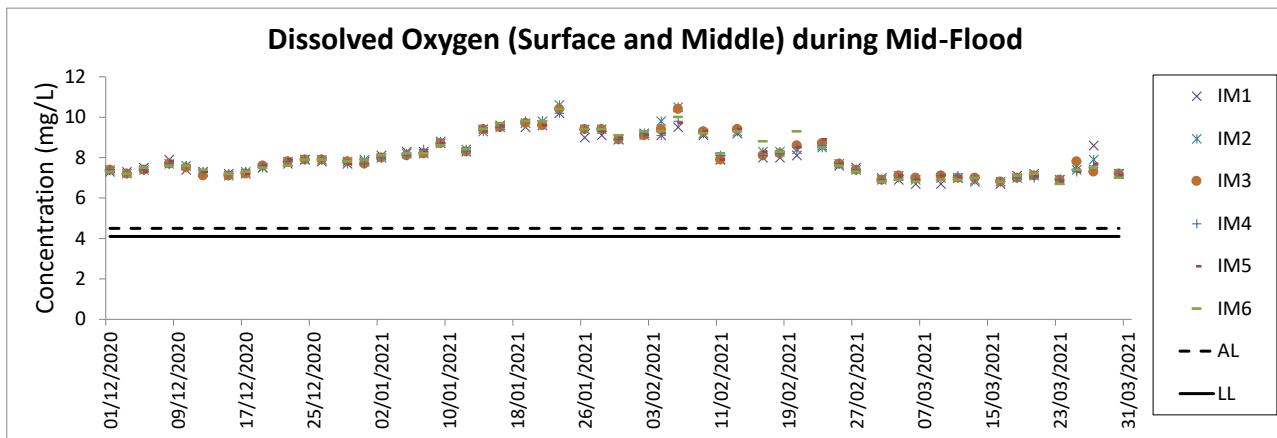

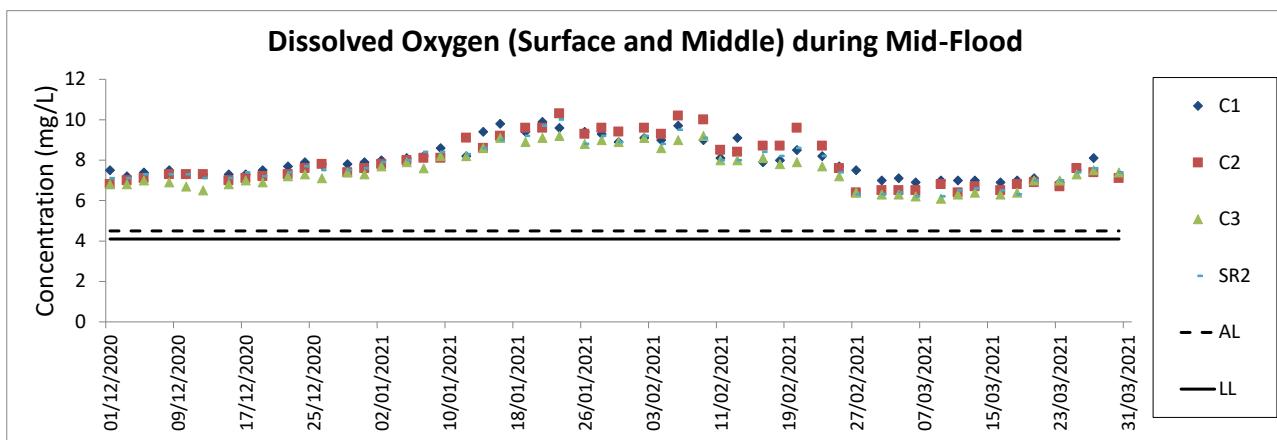

Notes:

1. The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as boreal piling for approach lights.
 2. General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
 3. QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

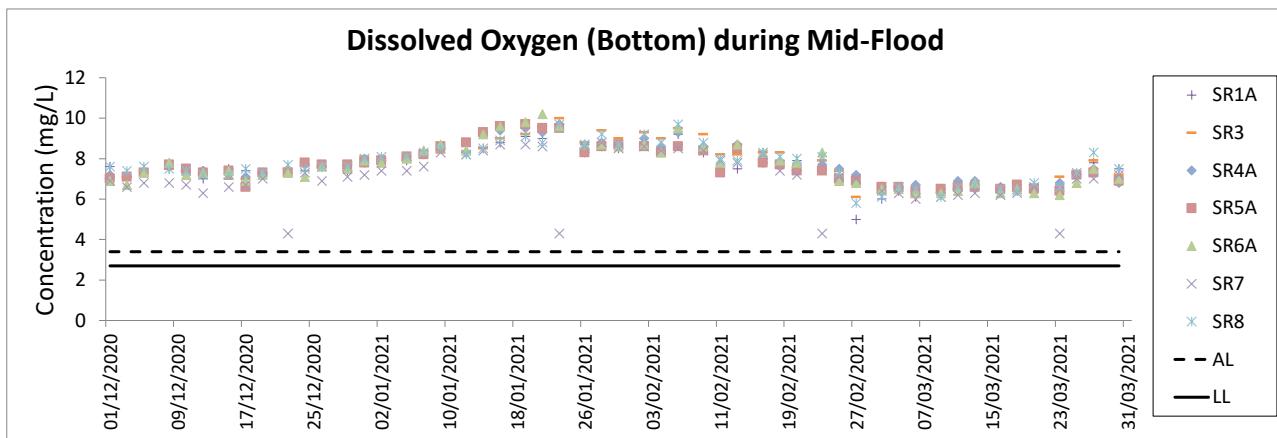

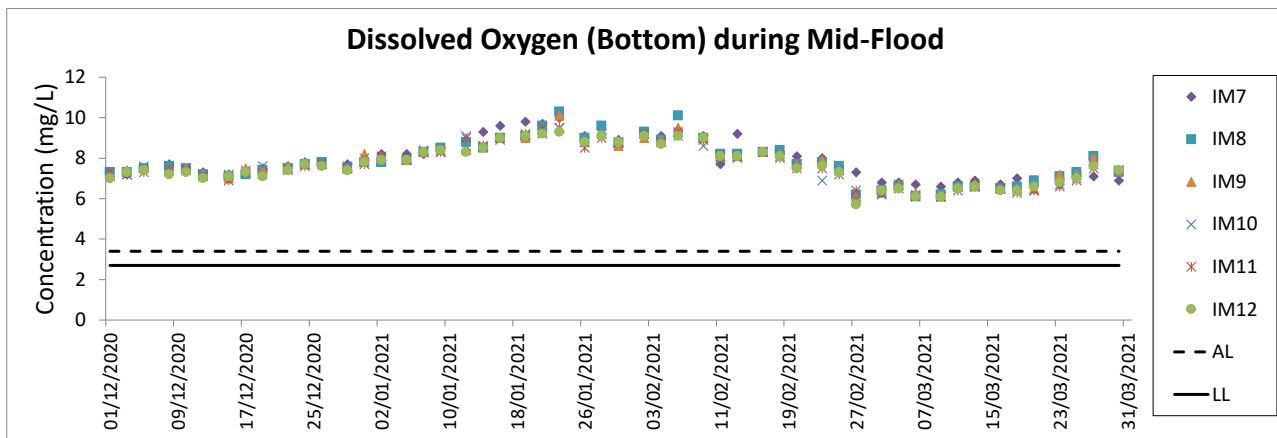

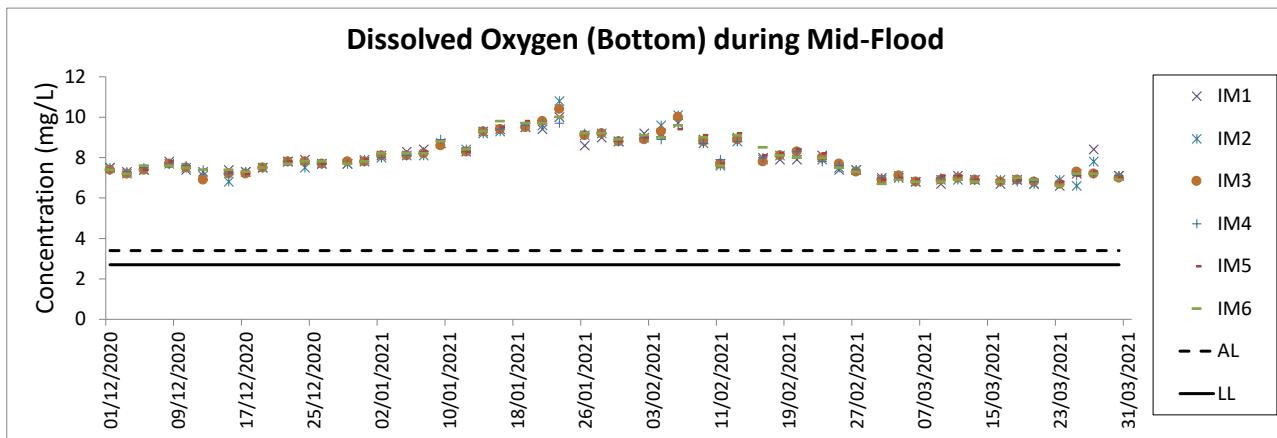

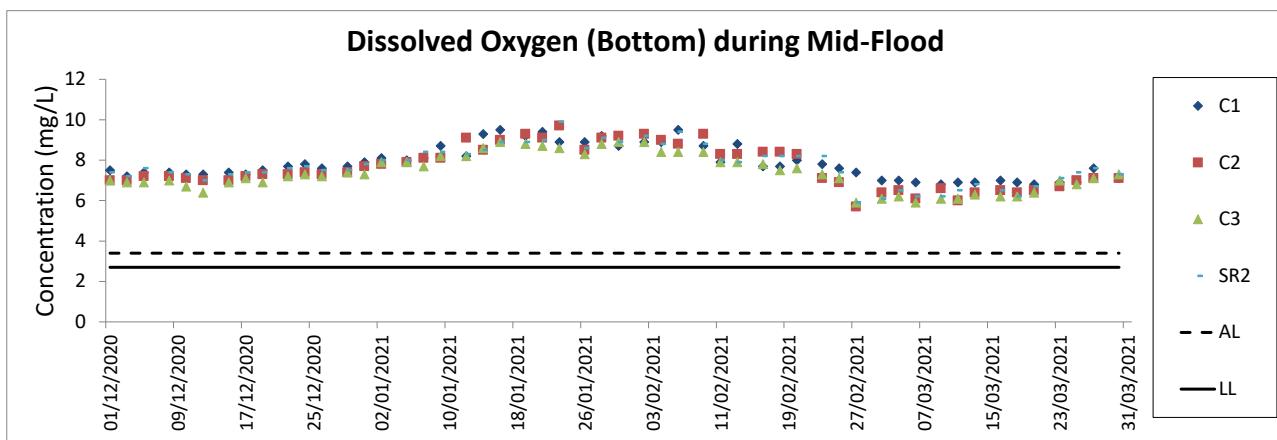

Notes:

- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

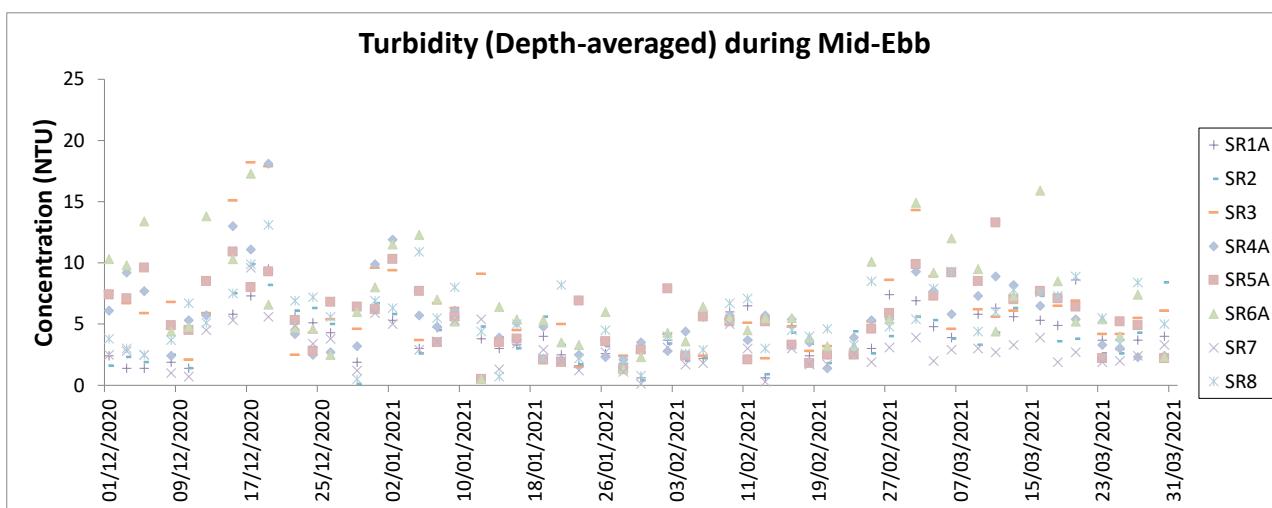

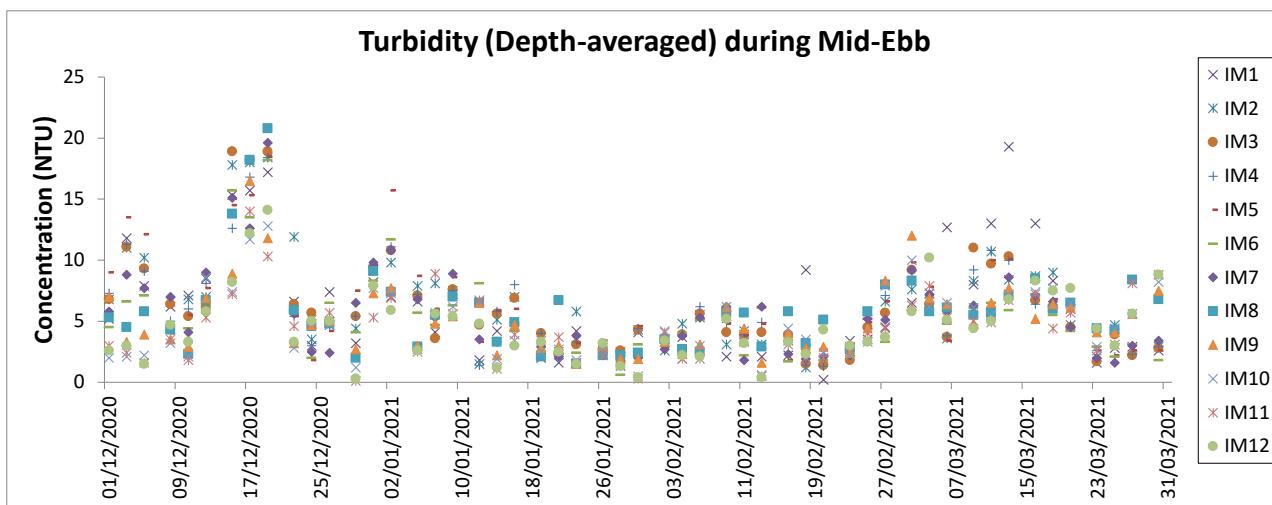

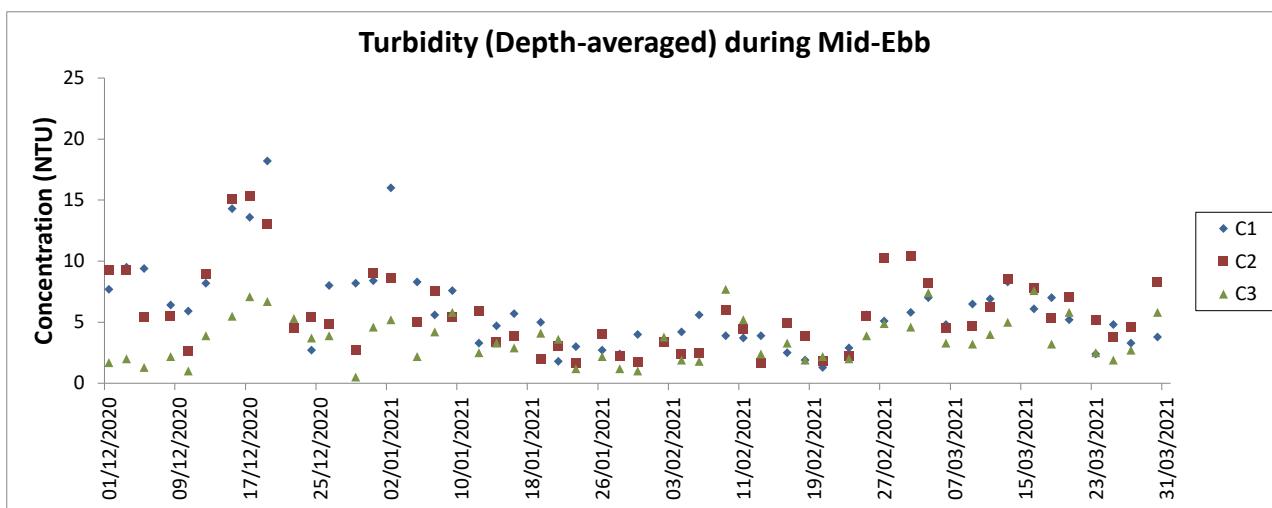

Notes:

- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

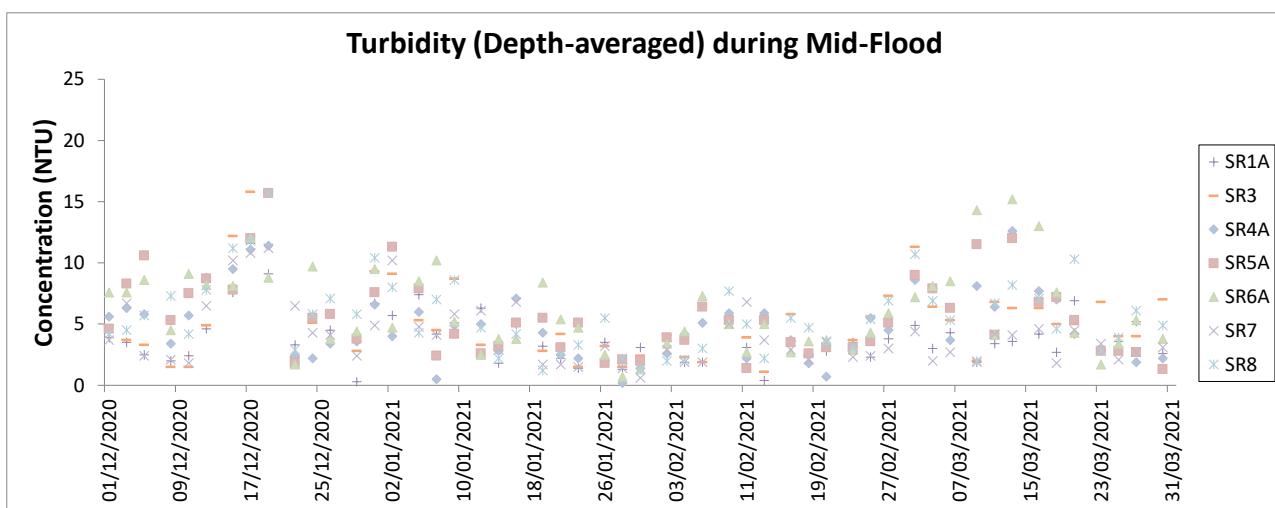

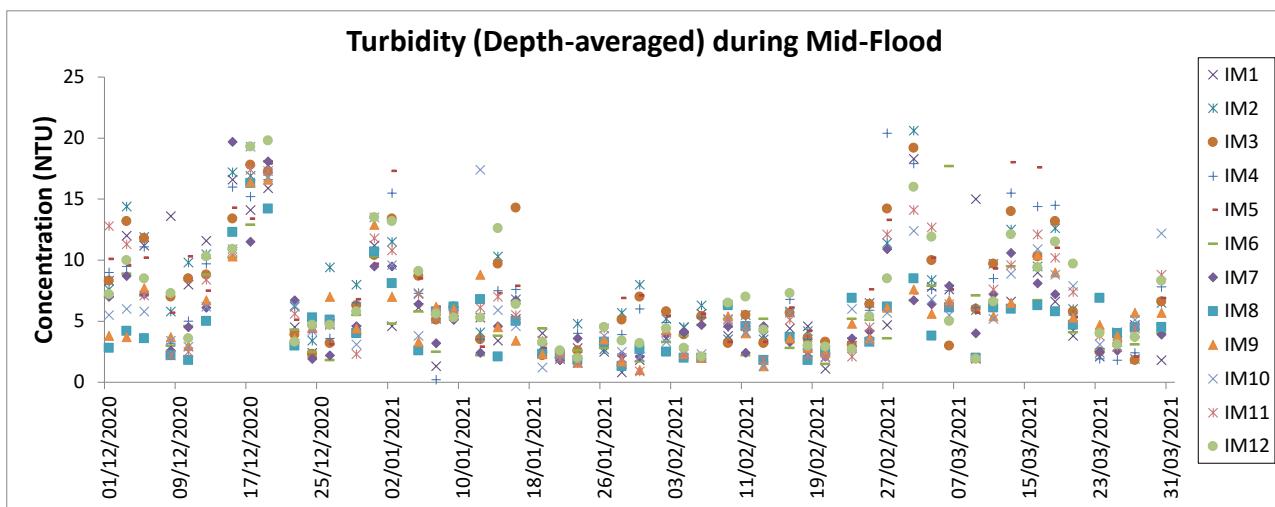

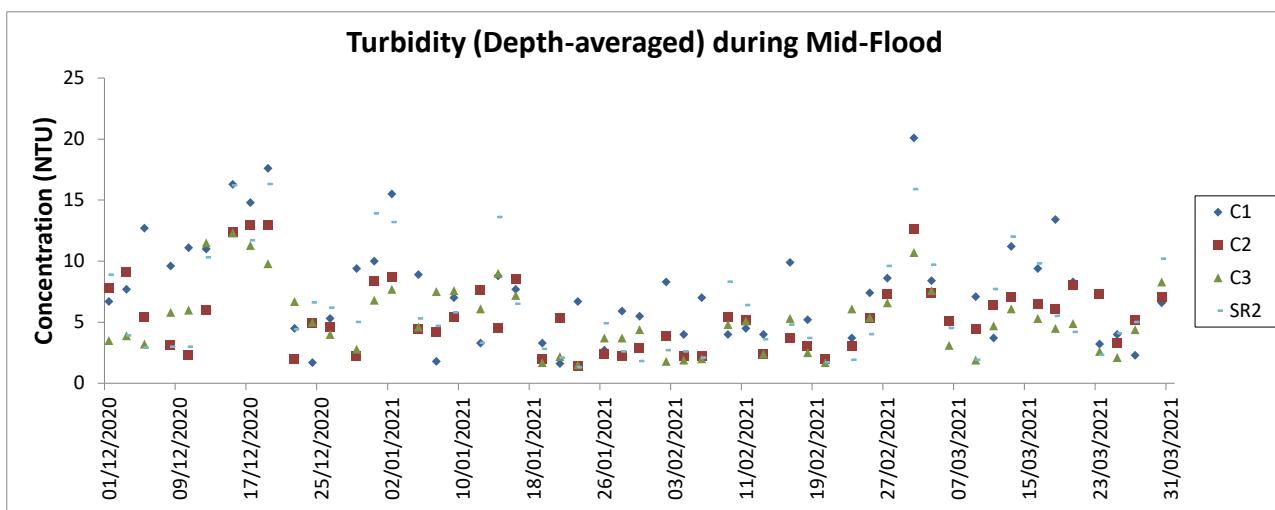

Notes:

- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

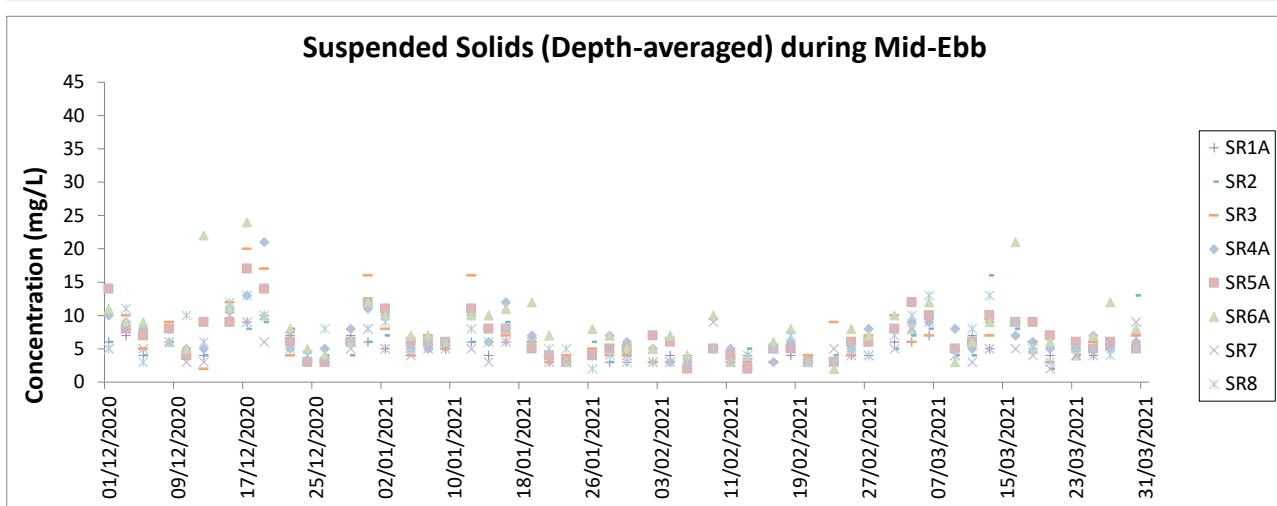

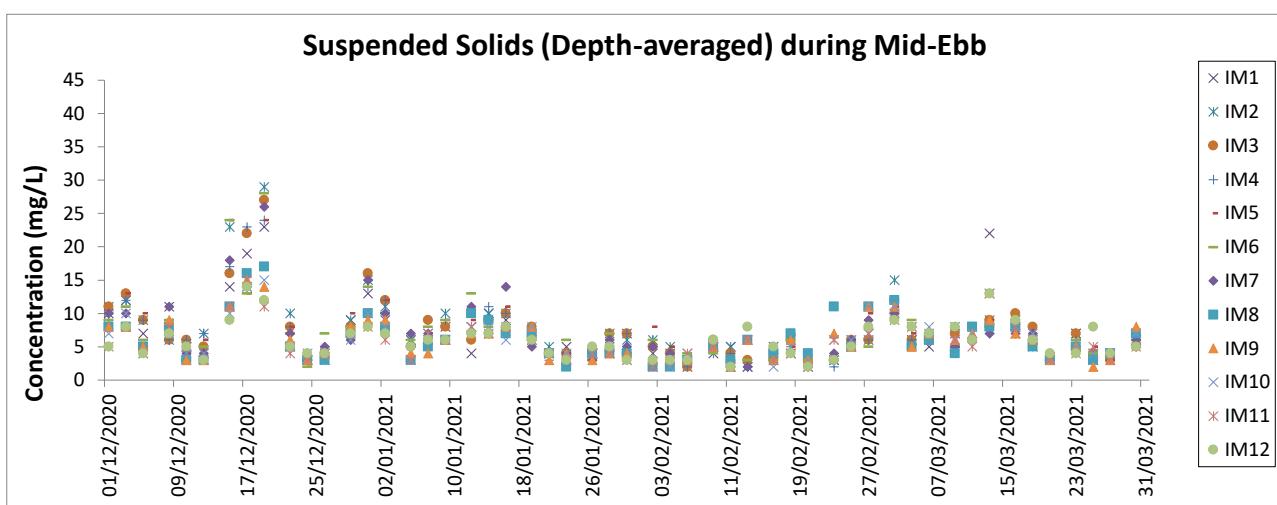

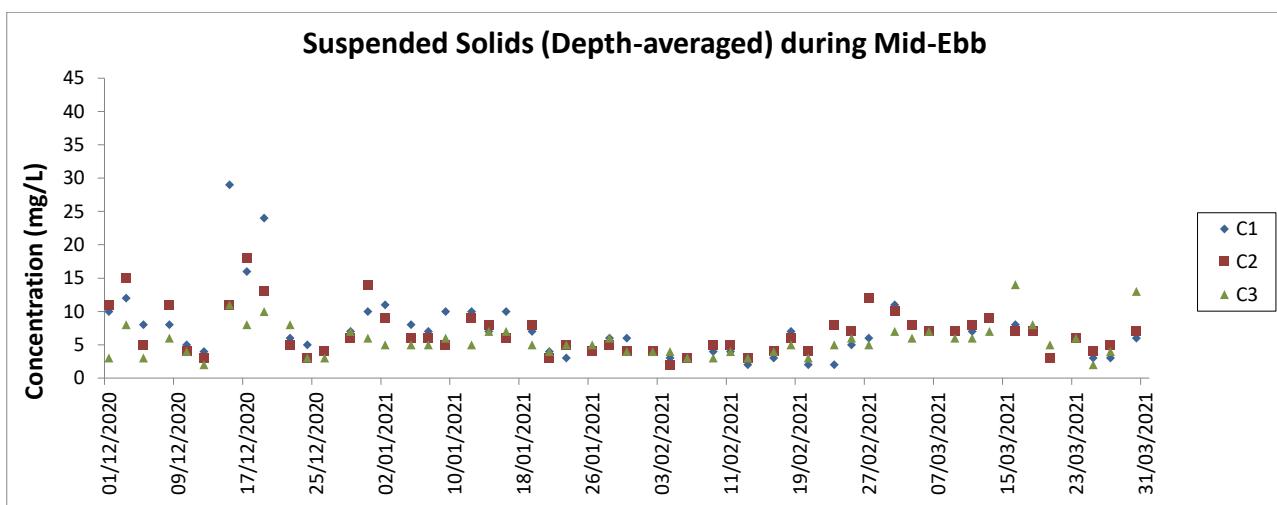

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

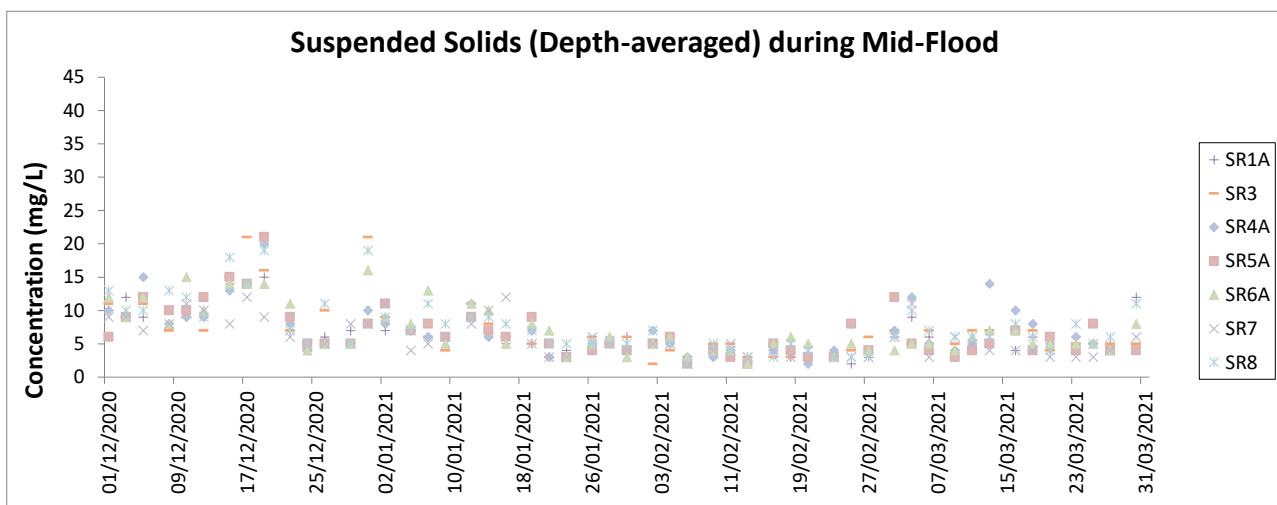

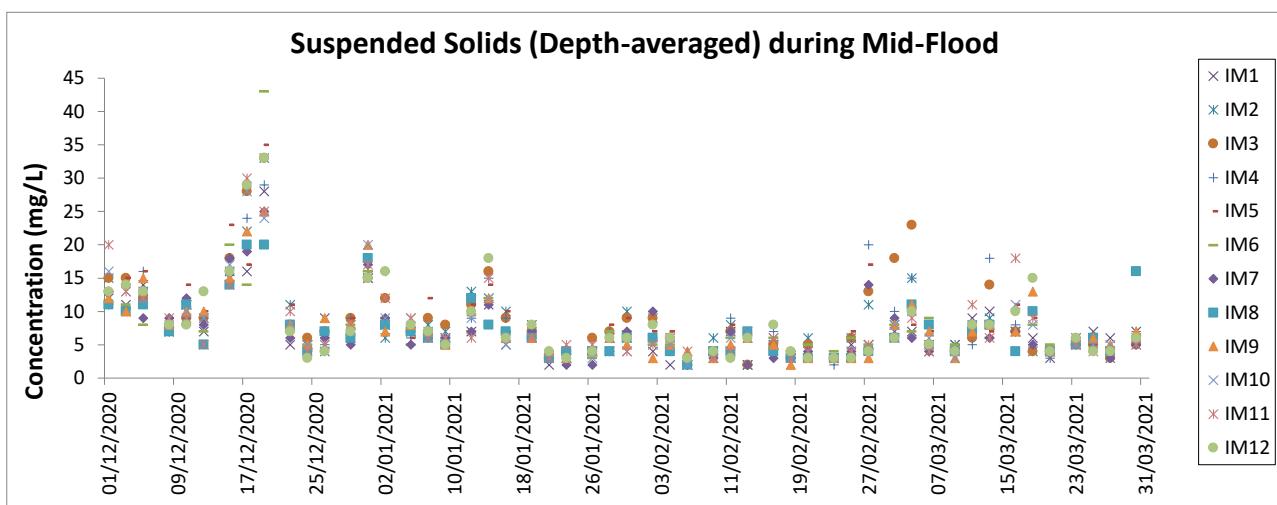

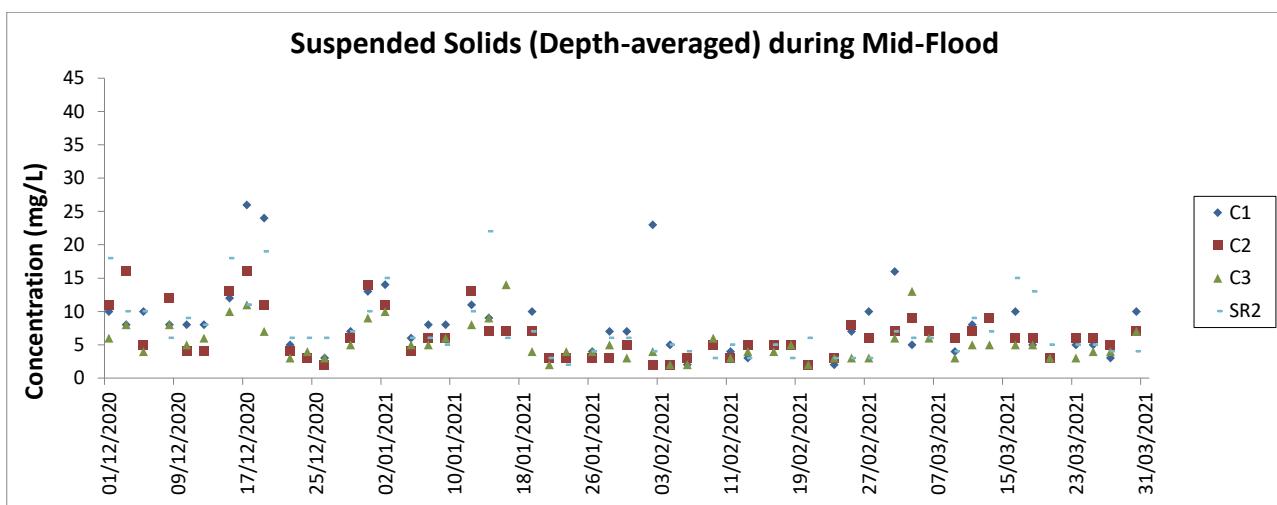

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

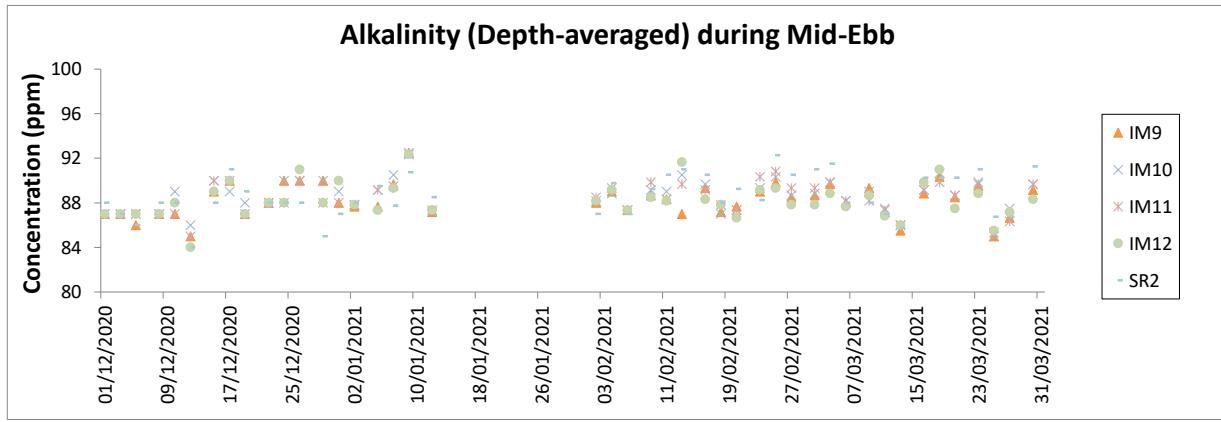

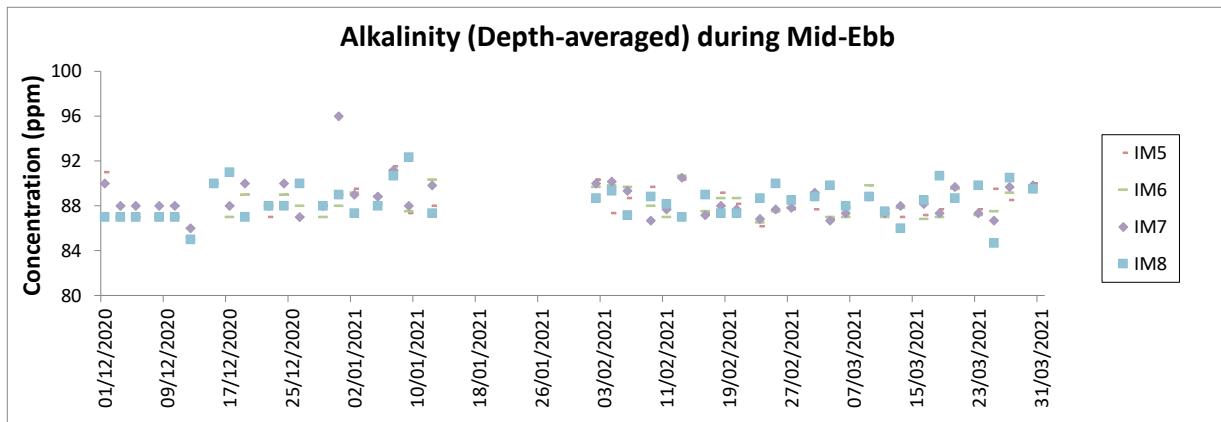

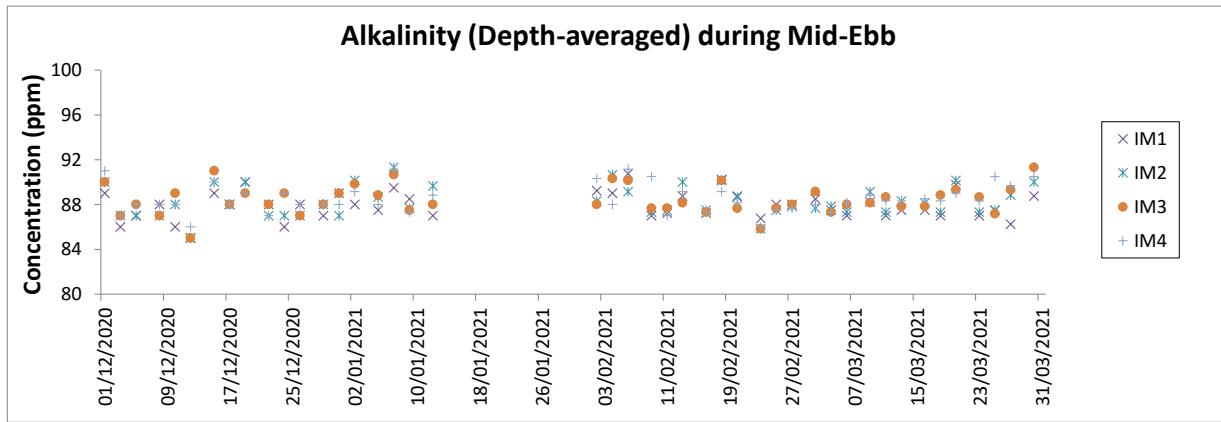

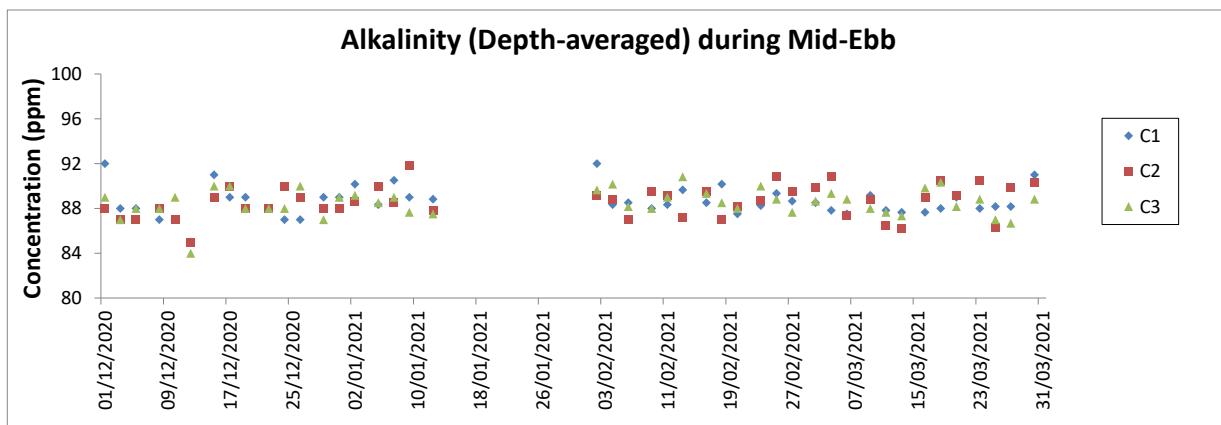

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

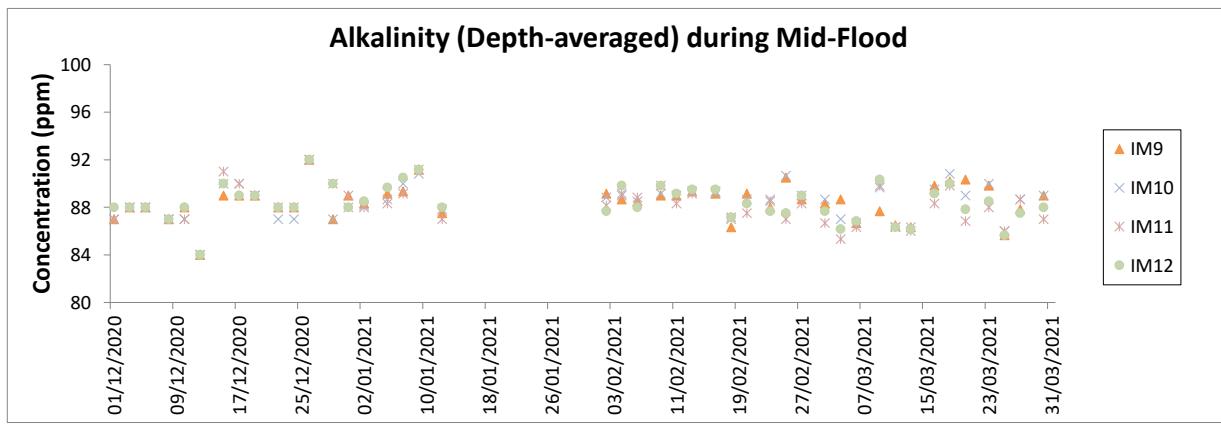

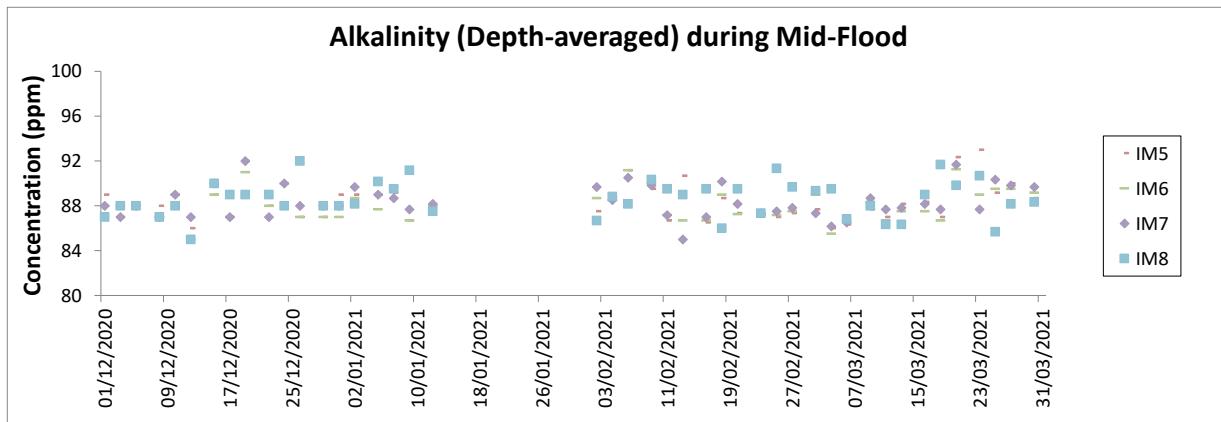

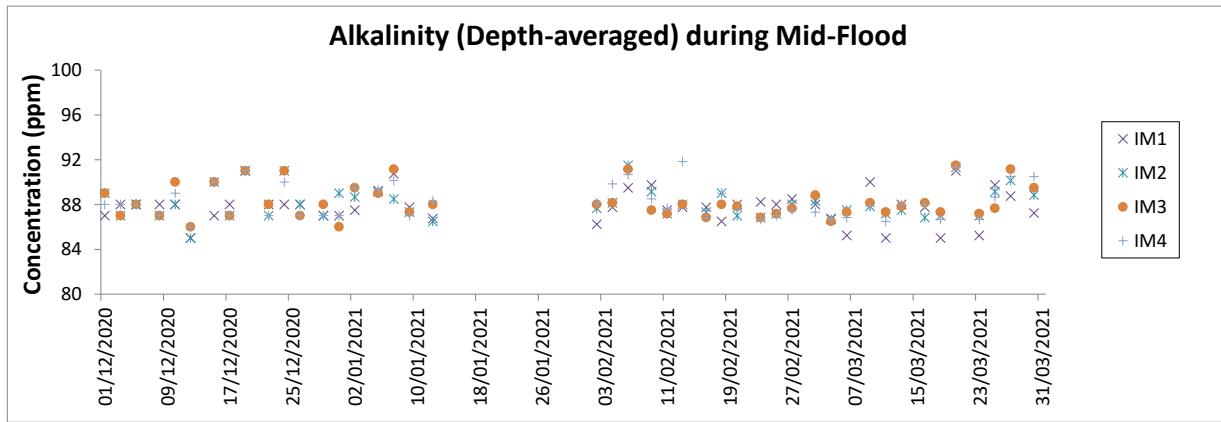

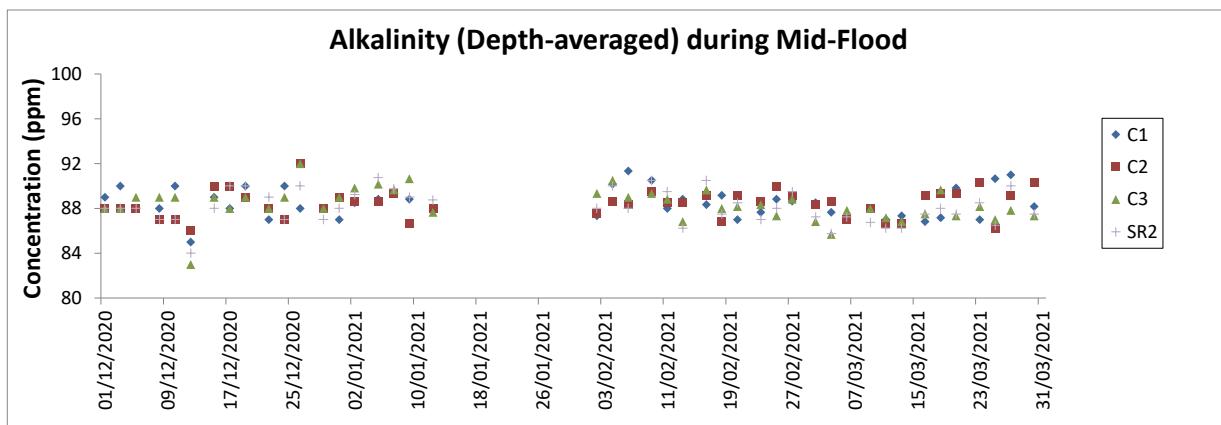

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.

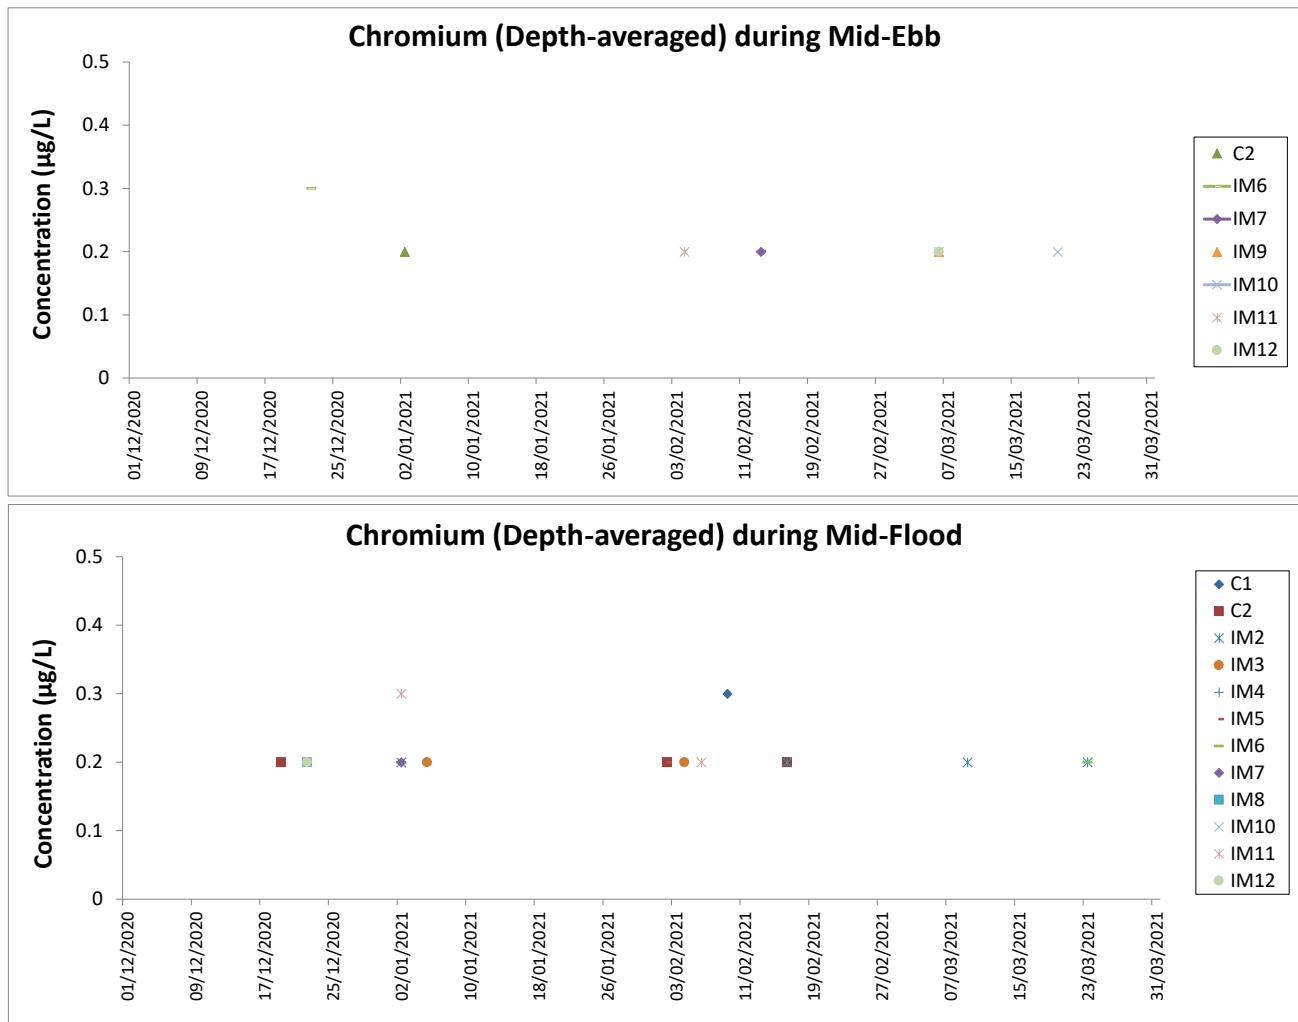

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.
- In view of the construction programme for marine-based DCM works, regular DCM monitoring, which was ceased since 14 January 2021, was resumed at all monitoring stations starting from 2 February 2021.

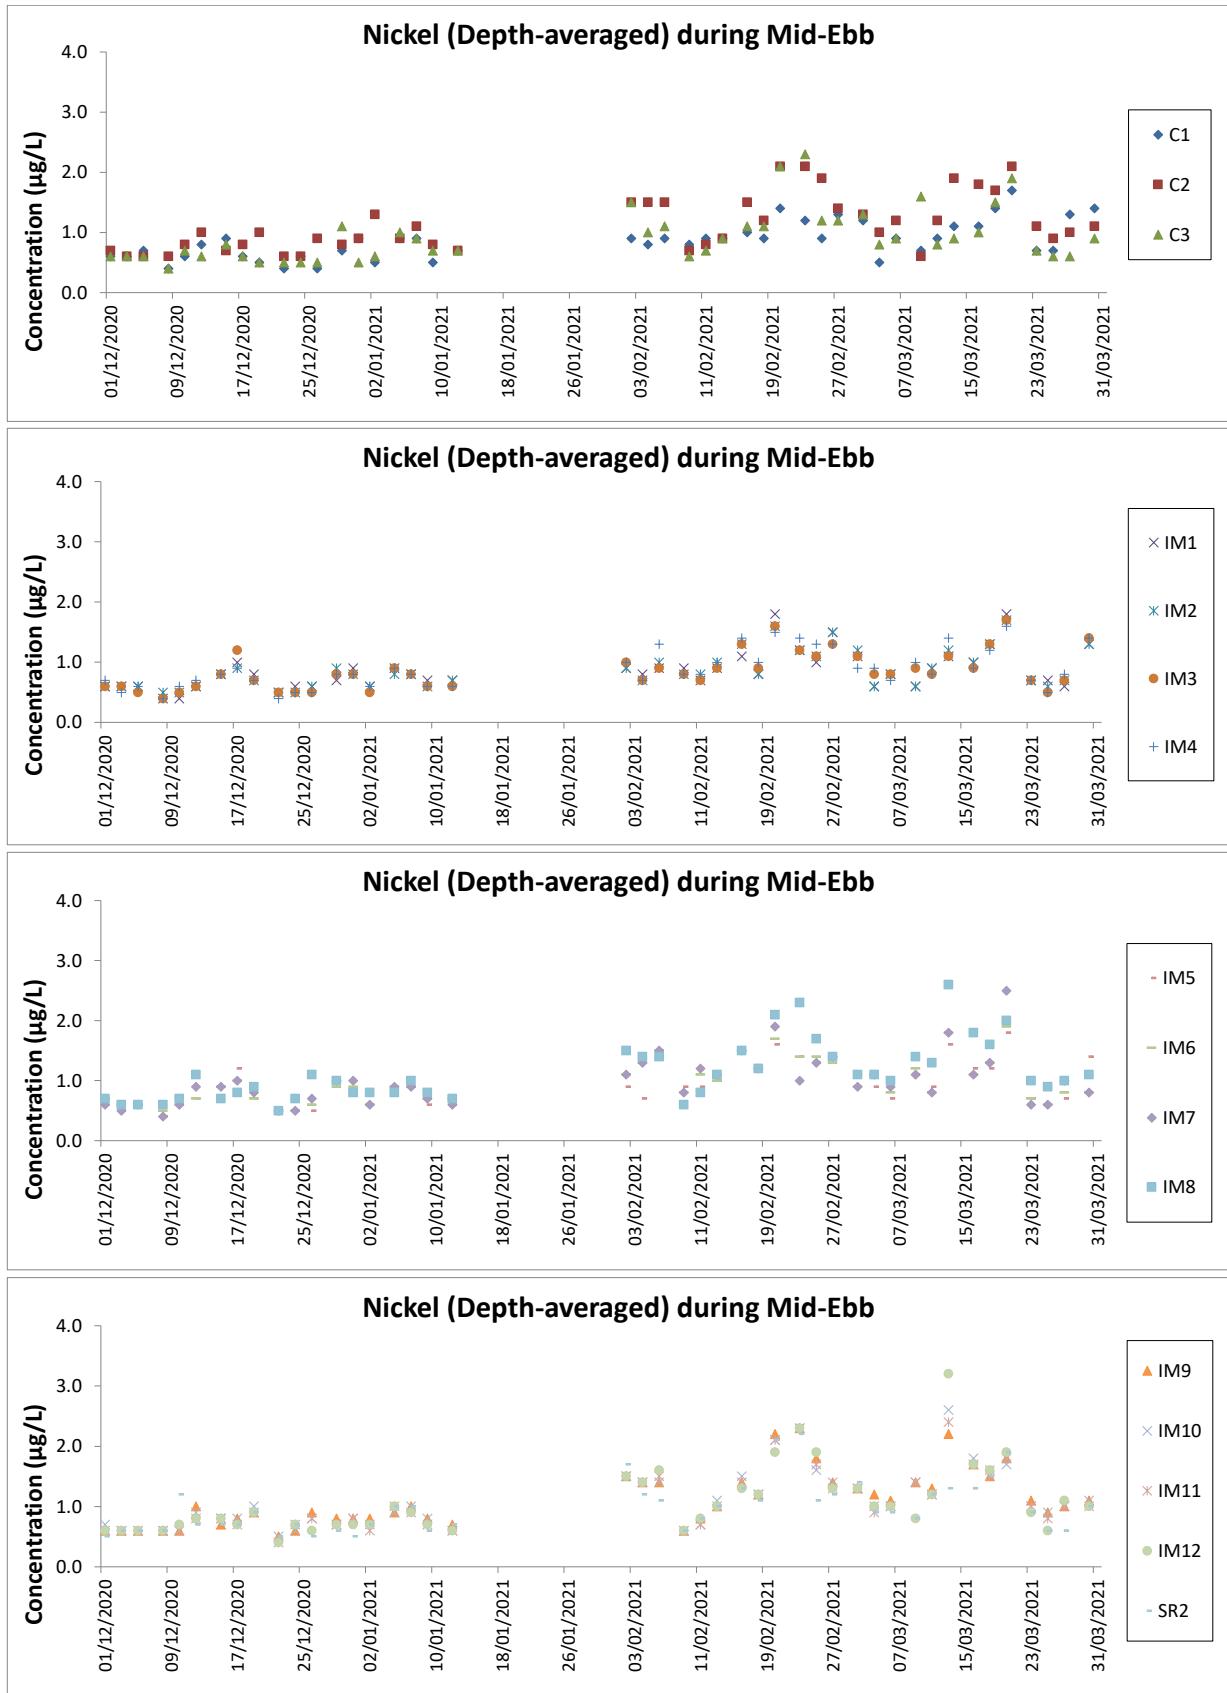

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.
- In view of the construction programme for marine-based DCM works, regular DCM monitoring, which was ceased since 14 January 2021, was resumed at all monitoring stations starting from 2 February 2021.

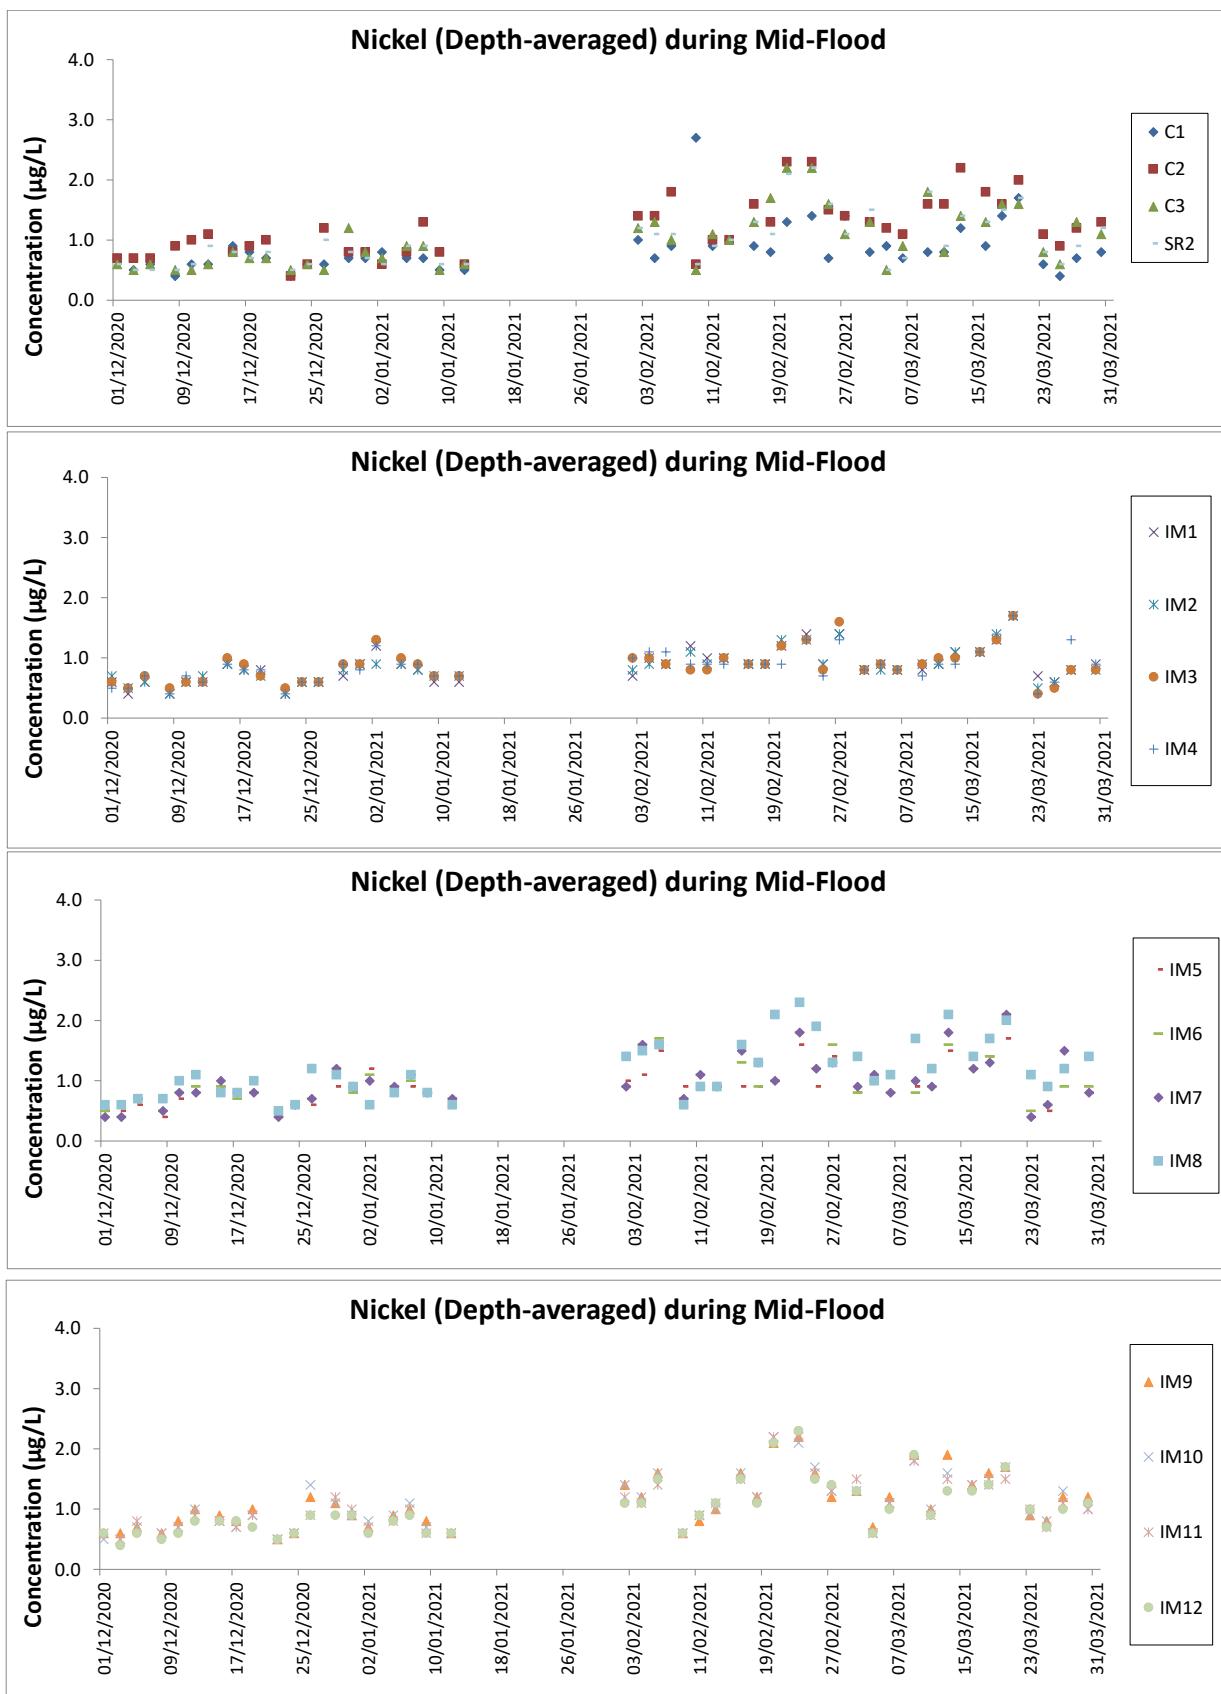

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The monitoring results of chromium not presented above were below the reporting limit of 0.2 µg/L.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/ QC requirements as stipulated in the EM&A Manual were carried out during measurement.
- In view of the construction programme for marine-based DCM works, regular DCM monitoring, which was ceased since 14 January 2021, was resumed at all monitoring stations starting from 2 February 2021.

Notes:

1. The Action and Limit Levels can be referred to Table 2.8 of this Report.
2. The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
3. General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
4. QA/QC requirements as stipulated in the EM&A Manual were carried out during measurement.
5. In view of the construction programme for marine-based DCM works, regular DCM monitoring, which was ceased since 14 January 2021, was resumed at all monitoring stations starting from 2 February 2021.

Notes:

- The Action and Limit Levels can be referred to Table 2.8 of this Report.
- The key marine works activities of the Project during monitoring included deep cement mixing (DCM) works, marine filling, seawall and facilities construction, together with runway and associated works such as bored piling for approach lights.
- General weather condition during monitoring ranged from sunny to rainy, with sea condition ranged from calm to rough. Detailed meteorological conditions can be referred to Table 2.11 of this Report and corresponding Monthly EM&A Reports.
- QA/QC requirements as stipulated in the EM&A Manual were carried out during measurement.
- In view of the construction programme for marine-based DCM works, regular DCM monitoring, which was ceased since 14 January 2021, was resumed at all monitoring stations starting from 2 February 2021.

Abbreviations: STG# = Sighting Number; GP SZ = Group Size; BEAU = Beaufort Sea State; PSD = Perpendicular Distance (in metres); N/A = Not Applicable; DEC LAT = Latitude (WGS84 in Decimal), DEC LON = Longitude (WGS84 in Decimal); BOAT ASSOC. = Fishing Boat Association

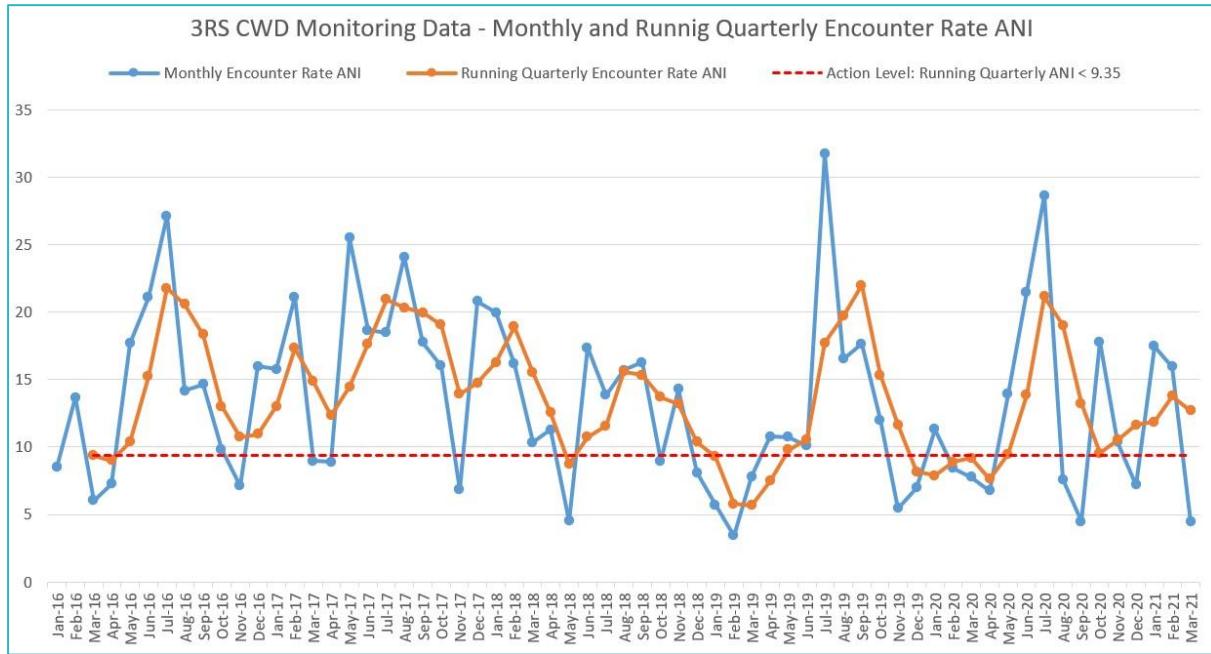

Sighting data of finless porpoise (FP) are presented for reference only. No relevant figure or text will be mentioned in the quarterly EM&A report. All FP sightings are excluded in calculation.
