

# **Appendix E. Sampling Results for Marine Sediment Samples**

Location of sample (grid number)	Depth of sample*	Pass/Fail RBRG limit	Exceeded RBRG parameter(s)	Remarks
<b>APM/BHS Tunnel and Ancillary Building with piled foundation</b>				
Grid 34	0 – 3 m	Pass	Nil	
	3 – 6 m	Pass	Nil	
	6m to bottom	Pass	Nil	

Note:

\* One marine sediment sample was taken if the depth of marine sediment to be excavated was less than or equal to 3 m. If the depth of marine sediment to be excavated was less than or equal to 6 m, a sample was taken from the depth of 0 – 3 m, and 3 – 6 m. If the marine sediment to be excavated was more than 6 m, a sample was taken from three different depths including one in the depth of 0 – 3 m, 3 – 6 m, and 6 m to the bottom of the marine sediment to be excavated.
