Remarks:

No AIS data was received from two HSFs on 30 May 2016 due to error of the ferry's AIS system.

Follow-up on instantaneous speeding

Referring to the data of SkyPier HSF movements in May 2016, instantaneous speeding (i.e. a sudden change in speed at over 15 knots for a short period of time) within the SCZ was recorded from 18 HSF movements. Among the 18 HSF movements, the duration of instantaneous speeding of 14 movements were less than 1 minute, whilst that of other 4 movements lasted for less than 2 minutes. After investigation, the AIS data and ferry operators' responses showed that all the cases were due to public safety / emergency reasons including local strong water currents and giving way to other vessels. The captain of all concerned cases had reduced speed and maintained the speed at less than 15 knots after the public safety / emergency incidents.
