

Marine Ecology Enhancement Fund (MEEF)

Borrowing of Project Assets

Upon satisfactory completion of projects funded by the Marine Ecology Enhancement Fund (MEEF), project assets procured by the recipient organisations in respect of the projects will be made available for borrowing by MEEF applicants if the applicants state in the application forms that they wish to utilise project assets and the project applications are approved. This arrangement further supports the funds initiative and encourage the sustainable use of project assets. Applicants can make reference to the List of Project Assets below and consider the use of these project assets, if applicable, when submitting project applications to the MEEF. For more details about the terms and conditions for borrowing the project assets, please refer to relevant sections of MEEF Guidance Note.
